ABSTRACT

A blockchain is a beneficial instrument that has aided in the development and commercialization of cryptocurrencies. This market has recently expanded unexpectedly, mostly to address the issues of decentralization and speed. There are now numerous opportunities for implementing blockchain technology, such as data storage, payment facilitation, and money-raising. Cryptocurrencies have also been shown to be an important solution in everyday life. Specific application areas are expanding and being researched as the cryptocurrency ecosystem improves. Digital currency is employed in a variety of fields and sectors. The use of digital currency is increasing daily. AZNT is intended to provide crypto and DeFi fans with secure, inclusive, innovative, and transparent staking services. AZNT enables consumers to participate in the cryptocurrency market conveniently and smoothly. AZNT is a fully integrated, decentralised, and cost-effective token staking platform.

INTRODUCTION

The AZNT Token is the first cryptocurrency token designed to adapt to changing market conditions and rules, and its users have ultimate control over it. It is a platform that values human life, as indicated by its tagline, "Being Human is Given, but Maintaining Our Humanity is a Choice." "By keeping our word, we hope to meet the basic human needs of people who don't have a place to live, no one to turn to for help, and no resources with which to meet their basic human needs."

The AZNT Token is a TRC-20 token, which is the token standard used by Tron. We've noticed that investors are looking for new fair launch tokens that will allow them to maximise their profits in a short period. We chose Tron, however, to indicate to our users that they are our primary emphasis. As a result, our cryptocurrency will be more stable and likely to survive than existing centralised and distributed cryptographic forms of money.

MISSION

Our client base and expansion objectives are vigorously sought by empowering newcomers and developing a strong community commitment to foster trust and address any problems that may emerge between the focal and members of our natural environment. Keeping the price of our token as a motivator for our representative holders. We must achieve our goal of providing a safe environment for our customers. We have no reservations about reaching an agreement on improvements to our understanding that will help our community, particularly homeless people in critical need of support.

We do not want to see the market manipulated in any way. We are constantly looking for innovative methods to improve the lives of homeless people because we think that More Is Possible. In a variety of locations, we aim to provide a haven, permanent housing, and supportive services to persons experiencing chronic homelessness.

VISION

We feel that the greatest noticeable influence is when new people enter the market and decide to stay. Understanding how the bitcoin world works will be overwhelming for newcomers to the cryptocurrency arena. Our business intends to create a phase that will deliver a remarkable consumer adventure experience while simultaneously providing a decentralised area that will entice newcomers to stay by providing a passive revenue stream and a sense of fulfilment that their presence is aiding their fellow humans. whether as stagegoers or as sellers

The goal of the AZNT Token is to provide a safe environment for exchanging valuable crypto while remaining decentralized. We are grateful to the holders who will help us tremendously expand our business, and we will continue to build this environment so that it can draw more invested people to the stage regularly.

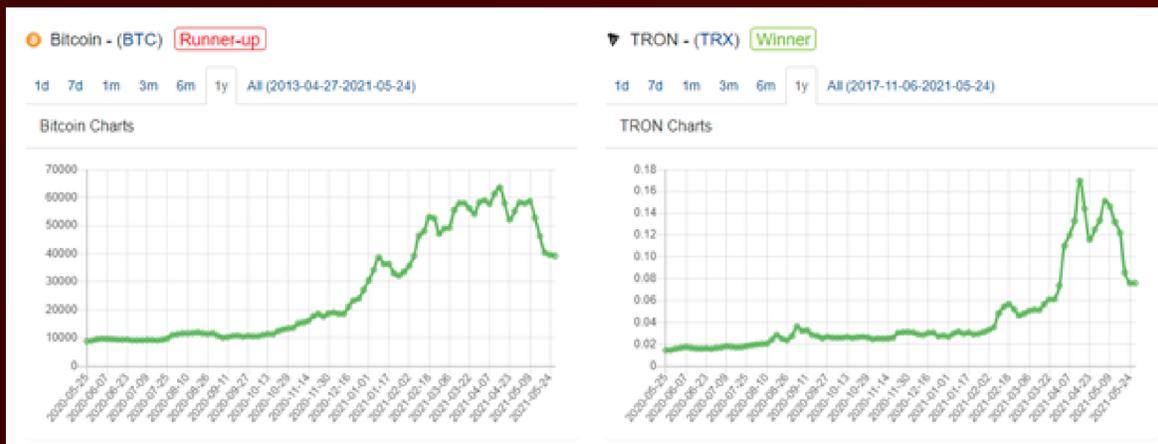

OUR WORKING BLOCKCHAIN PARTNER

TRON

TRON

Tron is a blockchain-based decentralized stage that means to construct a free, worldwide computerized content theater setup with appropriated capacity innovation, and permits simple and practical sharing

of advanced substance. Utilizing the blockchain and its decentralized brilliant agreement capacity, the possibility of Tron is that clients will encounter a decentralized web where "brokers, for example, Google and Facebook are not required for clients to get to the content. The TRON convention runs on a Delegated Proof of Stake (DPoS) Governance Model. This permits clients to perform exchanges with near zero-expense while as yet being safe towards exchange spam.

Exchanges on the Tron Blockchain are kept up by a consortium of Super Representatives (SR) that are cast a ballot in by TRX holders who have secured their stake as Tron Power

OUR WORKING BLOCKCHAIN PARTNER

TRON

TRON

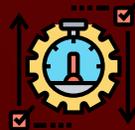

The entirety of this has given Tron the possibility to ascend high, rapidly, and assemble a great deal of help and interest from all sides. Since TRON empowers savvy agreements to be sent and executed, the chances of utility applications are limitless.

High-throughput

High throughput is accomplished by improving the TPS in TRON, which has outperformed Bitcoin and Ethereum, to every day utilize a commonsense degree.

High-versatility

Applications are given a more extensive assortment of approaches to be sent in TRON as a result of its adaptability and profoundly powerful savvy contract. It can uphold tremendous quantities of clients.

High-accessibility

More dependable organization structure, client resource, inborn worth and a more significant level of decentralization agreement accompany an improved prizes appropriation component

HOW OUR ECOSYSTEM WORKS

STAKING

AZNT staking is quickly becoming a practice of gaining passive income by merely storing or locking funds in a wallet as more individuals, including institutional investors understand the crypto market's lucrativeness. Since staking cryptocurrencies necessitates certain technological crypto know-how and compliance criteria, AZNT staking platforms are useful for allowing investors, including those lacking technical knowledge of cryptocurrencies, to stake proof of stake (PoS) coins and receive rewards. The staking network lends you their professional skills and authenticates stakes on your behalf for a small percentage of your staking prizes, allowing you to receive submissive profits. Staking platforms that enable investors to collect staking incentives have sprung up in response to the rapid growth in crypto staking. If you're interested in earning a passive income by staking and love supporting charities, this is the place to be

LENDING

It is well known that cryptocurrency is gaining popularity as a payment option. That's not all; it can also be a fantastic financial opportunity. The assets might appreciate in value while you retain them without intending to sell them, which is what crypto lending allows you to accomplish.

You may lend your bitcoin and receive interest in return, which is why this practise is so popular. Consider it like a savings account. A savings account allows you to keep your money while the credit union or bank pays you interest on the balance. In this manner, it can utilise the funds to make loans to others.

The AZNT Foundation is here to assist you in lending your coin. Then you must consider the type of exchange you desire, either fixed or flexible. The next step is to decide how many coins you want to lend. This is determined by market conditions, as well as the results you seek and your risk tolerance.

HOW OUR ECOSYSTEM WORKS

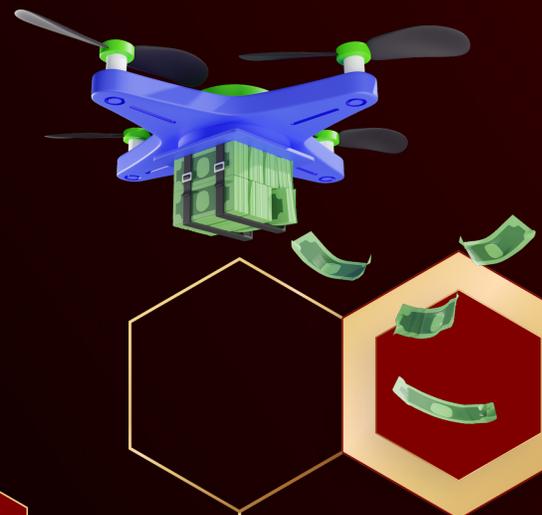

BURNING

The decision to burn tokens is vested in the developer team of the coin by acting upon the strategy of sending cryptocurrency tokens to a wallet that has no access key. We are giving a certain %age of the circulating supply in the burning process. Without the private key, these tokens cannot be accessed by anyone and are lost forever. We intend to save our platform from sharks and whales.

LIQUIDITY

Every trade contributes towards auto-generating liquidity that goes into multiple pools used by exchanges. If liquidity is unlocked, the token developers can engage in the famed "rug pull." Our Platform offers our users a liquidity-locked system. Liquidity is locked by delivering liquidity pool (LP) tokens to a time-lock smart contract and relinquishing ownership for a set length of time. Developers cannot recover funds from the liquidity pool unless they own LP tokens. This gives investors assurance that the token developers will not abscond with the liquidity funds. It is now standard practice for all token creators, which distinguishes a fake currency from a legitimate one.

HOW DO I PURCHASE ASTRAZION TOKEN?

AZNT Token works through TRON decentralized stage and for swapping i.e, purchase, selling, contributing it utilizing JustSwap. It is a TRON-based computerized liquidity convention that permits clients to trade AZNT with TRC20 tokens immediately in a decentralized way. JustSwap was dispatched by JUST which is an establishment resolved to foster TRON-based Defi conventions and investigate the capability of DeFi on the TRON organization.

#	Currency	Pair	Volume (24h)	Price	Volume (%)	Liquidity	Category	Fee Type	Updated
1	Tether	USDT/TRX	\$146,208,584	\$1	81.61%	0	Spot	Percentage	Recently
2	USDJ	USDJ/TRX	\$23,006,553	\$1.04	12.84%	0	Spot	Percentage	Recently
3	WINKLink	WIN/TRX	\$7,025,416	\$0.00051873	3.92%	0	Spot	Percentage	Recently
4	JUST	JST/TRX	\$2,629,609	\$0.06623606	1.47%	0	Spot	Percentage	Recently

To utilize JustSwap you need to have a TronLink Wallet. The stage is simply conceivable to utilize if you interface with a TronLink Wallet.

Stage 1: Connect your TronLink wallet to JustSwap

Stage 2: Swapping Coin on JustSwap

ROADMAP

APRIL 2021

- Testing & Team established
- Completed all testing and first version of site goes live
- Began working on website's back end
- Finilized token breakdown

MARCH 2021

- Idea & Concept
- Idea was born and concept outlined
- Began market research
- Domain & hosting purchased
- Started designing front-end

MAY 2021

- Marketing Starts
- Build community
- Increased personnel in I.T. and Crypto Development Team
- Continued market research

JUNE TO JULY 2021

- Smart Contract in TRON network
- TRC-20 AZNT Token deployed onto main-net
- Aim to achieve 200,000 holders by June 2022

ROADMAP

AUGUST 2021

- Achieved more than 20,000 members
- Planning for AZNT community foundation
- Pre ICO preparations

SEPTEMBER 2021

- Continued building community
- Achieved milestone of above 40,000 members
- Pre- ICO stage 2 conversion of platform token

OCTOBER 2021

- Successfully launched pre ICO sales
- Sold out in 3 days
- Incorporated
- Registered AZNT Astrazion Noble Tasks Community foundation, inc Philippines
- While begin strategic business planning, project and program
- Begin exploration of eco-system project

NOVEMBER 2021

- Building social reputation worldwide
- Start building social responsibility in community foundation in Philippines and abroad

ROADMAP

JANUARY 2022

- *Begin to established the AZ Program and AZ Project as part of the AZNT Eco-systems*
- *Registered AZNT GLOBAL HOLDINGS Incorporated, Philippines*
- *New corporate website development.. astrazion.us*
- *Begin testing of back end functionality*
- *Front-end redesign*
- *Social media account set up*
- *Begin matching design for back end*
- *Begin corporate working email designs*

DECEMBER 2021

- Registered AZNT GLOBAL HOLDINGS incorporated, USA
- List in crypto market platforms
- P2P platform launched
- P2P public new registration and login established

FEBRUARY TO MARCH 2022

- Registered AZMart incorporation Philippines
- Opening AZ24 conivent store as part of the AZNT ECO-system project
- AZPAY payment portal will be launched into virtual assets service providers as far as the BSP regulations is concerned.
- AZPAY is under AZprogrqm as part of the AZNT ECO-system project
- AZNT TOKEN smart contact to be deployed in trust wallet, metamask, crypto wallets, my tron wallet, torus
- Crypto wallet platform and more

APRIL 2022

- AZNT COMMUNITY FOUNDATION will launched our grand launching worldwide
- Secure a relationship with a leading cryptocurrency organization
- Finalize marketing material and strategy
- Listed in major leading cryptocurrency exchanger and platforms
